

# Dialysis

## Albumax

### CHANGING THEIR DIET CHANGING THEIR LIVES

- **EATING**

Is affected due to altered taste, anorexia, nausea and an unpalatable diet.

- **MALNUTRITION**

Patients with low serum albumin levels are at risk of malnutrition.

- **DIFFICULTY IN FINDING FOODS THAT SUPPLY HIGH QUALITY PROTEIN**

High quality protein allows a patient's body to maintain itself while limiting the amount of urea that is formed.

**AN EASY WAY TO INCREASE HIGH QUALITY PROTEIN IN A DIET TO RAISE BLOOD ALBUMIN LEVELS.**

# Albumax
